In the south, there is an island.
There is a big hill, too.
Behind the forest, there is a hill

Parrots are one of the most interesting birds in the world.

They are birds that are very intelligent. They are more intelligent than cats and rabbits. Parrots can say words. They hear the sounds humans make and they copy these sounds. Parrots can also do basic math and tricks. Parrots are birds that can live as long as humans — some for more than 70 years. There are more than 300 different kinds of parrots. Parrots eat flowers, fruit, and insects. They use their feet like hands to eat their food. Many parrots have beautiful feathers which are different colors like red, blue, green, and yellow. They are very friendly birds and get sad when they feel alone.
